

# Global environmental and energy fundraising must be called SPAWHE

## Summary

What is fundraising: research activities for the funds necessary to carry out work and social development activities with funds coming from public bodies, donations, companies, foundations and individuals. Probably, it is a more sustainable and democratic solution than a joint-stock company, which I had unsuccessfully proposed with the article published on **28.02.2020** <http://www.spawhe.eu/a-global-stock-company-against-errors-omissions-and-opportunities-wasted-by-science-and-world-power-centers/>, subsequently, I also proposed fundraising on **27.11.2021** <https://www.spawhe.eu/fundraising-in-defense-of-life-according-to-the-spawhe-model/>,

I return again to propose funds raising because the environmental situation of the planet is worsening day by day:

What is SPAWHE (Synergic Plants Artificial Welling Hidro Electromagnetism) is an alternative development model to the current one, based on the scientific organization of industrial, environmental, energy and healthcare work, which impartially rationalizes the choices of raw materials, energy sources, technologies to be used, not based on what the current market offers, which is dominated by commercial inventions of multinationals that are wrong from a scientific, economic and environmental point of view, accepted by public bodies and governments that collaborate through the global trade of patents to advancement of the world scientific and technological state of the art. The SPAWHE system can be

defined as the modern version of the Taylorism of Frederick Taylor who in 1911 published the monograph called "Scientific Organization of Work", from which the first mass assembly lines of the automotive and household appliance industries were born, and subsequently robotics to speed up industrial production. The undersigned, who was responsible for the scientific organization of work in the automotive industry at Alfa Romeo from 1970 to 1986, had the intuition that with different criteria, the scientific organization of work could also be applied to the environmental sector for increase the speed of purification processes. For this reason he left the automotive industry and began a new activity, as manager of the mechanical and hydraulic plant assembly of a small company that worked in public subcontracts in Italy and Tunisia (Ing. Caccavale S.A.S.), which ceased its activity in 2005 and since then has started working as an inventor, adding the two experiences. Above all, bringing the scientific organization of industrial work into the environmental sector.

As is known, despite having filed forty national patents, of which I have only extended six at an international level, due to the considerable economic cost of the international procedure, the undersigned has not found public and private interlocutors available to create such inventions. But the facts are proving me right as in a few years climate change has become more accentuated, floods and droughts alternate with impressive rapidity and all the infrastructures that I have proposed and described in almost 120 articles published on the website <https://www.spawhe.eu>, if they had been taken into consideration they would have prevented the disasters themselves. But above all, they would have created the foundations for an alternative development model to the current one, with economic advantages for everyone, as electricity can be extracted cleanly directly from the environment, consequently, we have not only made mistakes in the environmental systems and energy, but the entire terrestrial development.

## Description

If the current Earth ruling class reasoned objectively and impartially, it would have to agree that current development, based on fossil, nuclear, solar and wind energy, has low energy yields compared to the energy source they use. In the case of fossil and nuclear energy, everything that is not transformed into electricity is transformed into pollution and steam. Solar energy also has a low efficiency as the sun's heat does not produce electricity directly and therefore solar energy also produces unwanted vapour. In the case of wind energy, the cost of transporting the energy to use has a considerable cost and like all'energy transport on pylons it interferes with the natural ion exchange between the earth's surface and the ionosphere, which is the true system of thermoregulation of the planet through natural atmospheric disturbances (lightning, rain, snow and the four annual seasons) which today is profoundly altered compared to the pre-industrial era.

Instead, the SPAWHE inventions, never realized by governments and multinationals, would allow clean energy to be cold extracted directly from the environment and distributed rationally on planet earth, through the simple rational distribution of drinking water on the entire planet, which would avoid the current flood disasters and the equally disastrous summer droughts. Terrestrial drinking water is the best energy carrier from a physical point of view, as it is 830 times denser than atmospheric air and combustion fumes. When hot air and fumes are used to produce energy through the turbines of thermal power plants or turbo combustion fans of airplanes and helicopters, they always have lower efficiency compared to the circulation of pressurized water. Obviously to use water as an energy carrier, we would have had to develop a development model completely different from the one developed on planet Earth, where the entire world science, including that of Einstein (best scientist) and Tesla (best inventor),

have used heat as the primary source, instead of using atmospheric air pressurized by gravity at a pressure of one bar, as the starting point. Which, obviously, can be further pressurized as desired with compressors for other applications. What world science has not understood is the fact that compressed air, to be used as an energy source, must be used one way, otherwise it behaves like an energy carrier. To use the force of compressed air one-way, other inventions were necessary. Mainly, the pump with the double separate power supply up to the impeller which allows two supplies with different pressures to be dynamically balanced in the body of the impeller, allows the recovery of the water that has produced electricity through the recycling of the water inside a pressurized autoclave with a flow rate double that which produces electricity. Not only can this solution produce free energy by extracting it from the earth's environment, it also allows polluted water to be purified for free, as every time the low-pressure water is inserted into the pressurized recycling circuit it absorbs a greater quantity of oxygen, therefore it purifies itself.

We must not forget that the undersigned has so far been the only inventor who has proposed cold extraction of electrical energy from the environment through a series of Italian national patents reported below. We must not forget that in the proposed solutions, there is also artificial welling, which would allow the use of petroleum derivatives to create artificial islands which would certainly be more useful in view of the increase in the world population. In fact, not only would they not produce the current pollution. But they would allow an immense increase in quality fish-based food production, with costs immensely lower than those of meat produced from land animals, which also produce biological pollution. It wasn't easy to work alone on these interactive purification and energy solutions, which no one sees and which no one feels the need for. I have been forced into solitude in the workplace, and also to work for free for future

generations who are not to blame for the choices made by the current ruling classes. However, the turning point that led me to start extracting clean energy directly from the environment and producing artificial welling and a more efficient and economical model of terrestrial development than the current one began with the following Italian patent filings:

102014902290390 (CE2014A000011) dated 09.03.2014 entitled Marine water pumping systems suspended from floating platforms for down and upwelling; 102014902298581 (CE2014A000012) dated 03.11.2014 entitled vertical hydroelectric plants with water recycling; 102015000048792 (UB2015A003412) dated 04.09.2015 entitled Mobile perpetual current generators with compressed air or gas and water recycling; 102015000048796 (UB2015A003404) dated 07.09.2015 entitled Electric pumps and turbines with double feeding mouth; 102016000057968 (UA2016A004148) dated 06.08.2016 entitled Desalinizers – vertical ion exchange demineralizers with hydroelectric energy production; 102016000058416 (UA2016A004177), dated 08.06.2016 entitled Floating system with extruded, ribbed, reinforced and polystyrene filled polyethylene tubes; 102016000066396 (UA2016A004687), dated 06.27.2016 entitled autoclave system for water lifting, producer of hydroelectric energy; 102016000087373 (UA2016A006226) dated 08.26.2016 entitled Hydroelectric car with peripheral driving torque at the wheels; 102016000111939 (UA2016A008002), entitled Pressurized hydroelectric plants submerged in wells with lifting and oxygenation; 102016000111938 (UA2016A008001), dated 11.16.2016 entitled Pressurized hydroelectric plants submerged in basins with lifting and oxygenation; 102016000058018 (UA2016A004152), dated 11.16.2016 entitled Floating, hydroelectric, desalination plant, calcium and carbon extractor from deep sea waters; 102016000130510 (UA2016A009428), dated 12.23.2016 entitled Pressurized domestic plumbing system, hydroelectric energy producer; 102017000059993 (UA2017A003967) dated 01.06.2017 entitled Pressurized hydroelectric aerospace transport system with turbofans and compressed air injection.

The list continues with other inventions on fuel-free aerospace transportation. But stopping at the production of submerged hydroelectric energy in basins and aquifers, my reflection that I propose in this article is the following:

The destruction of the Bargi power plant which occurred this year in Italy confirmed to me that world science does not know how to design anthropic plants. In fact, I took the liberty of virtually modifying it, transforming it into a submerged hydroelectric plant, reinforced with compressed hydroelectric, which not only does not need the hydraulic jump to operate all year round, it also has the advantage of being able to work with the maximum hydrostatic pressure while maintaining the upper basin always at the minimum level to prevent floods and the collapse of dams which have created more disasters than benefits for humanity since the world's first hydroelectric power station was built in 1890. As an inventor, I apologized to the world's people for the delay with which I thought about the invention of the submerged and compressed hydroelectric plant which can be made even in small dimensions to be mounted on all means of transport in the world and even in small dimensions for create small artificial hearts, energetically autonomous, which by oxygenating the blood, could defeat the main human diseases and extend current life by hundreds of years. Unfortunately, for current science that created global warming and wants to take us into space with fuels and nuclear energy, it seems that the inventions of the undersigned are hot water. I believe that despite the Nobel Prizes that have been shared among them, as designers and inventors they are amateurs at risk and are destroying the planet. They didn't even realize that they never managed to add together the push of Newton and Lorentz. In fact, these two forces can only be added by producing electricity coldly as the coils of the electrical wires are protected with insulating paints which can only work at earth temperature. Electronic control circuits also need cold-produced energy. For this reason I titled my latest article "Sorry for the delay". My fault is

that of being born in 1949 and not 1849 and of having wasted almost forty years learning about current technologies, before trying my hand as an inventor. Obviously inconvenient for all the powerful of the earth. It is a question of multidisciplinary and interactive design which is not taught in any university and is not practiced by any multinational, as multinationals also specialize in individual sectors. It is a question of the scientific organization of global work which can only be learned by transferring industrial experiences into environmental and energy ones, which today work in watertight compartments throughout the world. For this reason I proposed myself as a retired inventor, annoying professors, entrepreneurs, politicians and economists, who continue to think in watertight compartments.

Meanwhile, global warming continues to advance and none of the solutions reported on the website <https://www.spawhe.eu> have been funded and tested. The United Nations protects the industrial property of entrepreneurs and not the intellectual property of inventors who propose alternative development without fuel and nuclear energy. The following recent article by the undersigned denounces this situation:

**20.06.2024**

**[https://www.spawhe.eu/the-causes-the-culprits-and-spawhes-solution-against-global-warming-second-open-letter-to-the-real-un-secretary-antonio-guterres/;](https://www.spawhe.eu/the-causes-the-culprits-and-spawhes-solution-against-global-warming-second-open-letter-to-the-real-un-secretary-antonio-guterres/)**

After the publication of this article, I should have expected funding from the United Nations to test my inventions, but instead I am forced to report a further extortion attempt. Below I report my recent correspondence with a fake United Nations Official who I did not understand in what way he wanted to circumvent me and what advantages he would have obtained if I had agreed to carry out all his requests:

Attention: Antonio

This confirms receipt of your message, indicating that you are still alive and not dead as assumed by the impostor.

Please note that the department responsible for this criminal act has initiated an investigation into Mr. Leonard Green with a view to prosecuting him.

We understand that, to our knowledge, the delay in paying your funds is due to the high costs of bank-to-bank fund transfers and required documentation.

Please note that the United Nations, in collaboration with the World Bank, the International Monetary Fund and a cryptocurrency company, have significantly simplified the payment of compensation by making it mandatory to pay funds via Bitcoin Trust Wallet.

With this payment method, you will be asked to reconfirm the following:

Your full name:

Your contact telephone number:

Your postal address:

Your age:

Your occupation:

Your photo ID:

After confirming the requested information, you will be immediately informed about the next step.

Waiting for your response.

Best regards,

Mr. Andrew Rizk.

Attn: Antonio

This confirms the receipt of your message together with your details.

Please be informed that the payment process of your funds has commenced to be paid via Bitcoin Trust Wallet for free without any cost of transfer or document charges.

All that is required of you is to furnish us with your Bitcoin Trust Wallet account.

As mandated by the World Bank and UN, It is compulsory that your Bitcoin account is funded as to enable it accommodate the US\$17.5Million.

Whereby you do not have Bitcoin Trust Wallet account, you will have to urgently establish one, fund it and forward to me for immediate release of your fund.

Most importantly, make sure you keep your Trust Wallet password confidential all to your self without releasing it to anybody.

I await your response.

Yours Sincerely, Mr. Andrew Rizk.

**This confirms the receipt of your message. It is good that you have opened a Trust Wallet account. Please make sure you keep your pin or password secured, you don't need to give it to anybody including myself. You can only give me the Bitcoin account only to process your payment.**

**All you need to do right now is to fund it, that is the criteria/instruction by the initiators of this compensation payment program. If you do not fund your Trust Wallet, it will not be able to attract the us\$17.5Million waiting for you.**

**You are free to ask me any question if you need any more clarifications**

**I await your response.**

**Yours Sincerely,**

**Mr. Andrew Rizk.**

Luigi Antonio Pezone <luigiantonio.pezone@gmail.com>

It is very strange that the World Bank favors bitcoins which allow tax evasion and does not believe the identity of an inventor who has filed over 40 national patents and several international patents with the WIPO, which is an organ of the United Nations. Furthermore, my identity is also confirmed by my website <https://www.spawhe.eu>. If the United Nations really wants to work for humanity, it needs to be more coherent

What does it mean to attract? At most I can subtract a hundred euros from the family budget without my wife noticing the loss. Is there or not funding for my work as an inventor?

**This confirms the receipt of your message.**

**Please understand that putting money into your Trust Wallet is an order from the initiators of this payment, the likes of the world bank, IMF and the UN.**

**They want to be sure the money is not going to the wrong person or rubot, therefore the instruction must be followed.**

**Nobody is charging you to receive your compensation funds of us\$17.5Million. The Wallet belongs to you, the password and pin should not be shared to anybody including myself.**

**The amount that can accommodate the us\$17.5Million is from us\$5,000 and above without your wife noticing since you can recover the funds within a few days when your compensation funds will be transferred into your Wallet, all is your money in your position.**

**I hope you will understand my explanations.**

**The moment you fund your Wallet and inform me, I will direct you to contact the Crypto credit officer to confirm and credit your account immediately.**

I await your response.

Yours Sincerely,

Mr. Andrew Rizk.

This confirms the receipt of your message which is well noted and understood.

I want to let you know that having your details and every other information is good but not what the law and order of the world bank, the IMF and UN stipulates before we embark on this program.

you can have about 3,000 to 5,000 Euros and above in your Trust Wallet today, your Wallet account will be credited immediately with your US\$17.5Million compensation funds through the crypto credit officer I am going to furnish you with his contact information.

This program doesn't need to take all these while to be completed. 100 percent of you that was contacted by me, 90 percent who followed the instructions have received their funds. And I want you to do everything possible to have your funds before the end of this week.

I will wait for your response for further proceedings

This is to inform you that the offices involved in your compensation have received the contents of your last message to me where you mentioned that my name was not shown on the UN website, that we should close the matter. We never asked you to send any money to us and will never ask, all i am doing is according to the order of the initiators of this compensation funds payment. Out of the 22 clients I contacted, it is you and another who is looking for money to deposit in his Bitcoin account in order to receive his funds that are now remaining for the final payment.

They want to know if you are still interested in receiving your funds or not. I am sorry for the way i responded to your

message yesterday, though it was embarrassing, because you are the only person who said that about my name, i hereby advise you again to go to google and search my name and position in UNDP.

This Bitcoin account below is where the credit officer will credit your Trust Wallet account with your us\$17.5M the moment you put money in your Trust Wallet. You can check and see how many Billion that is in this account where we have been paying clients their compensation funds.

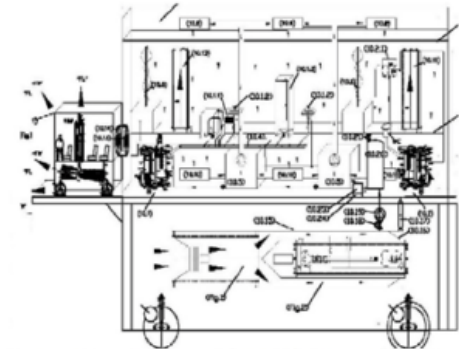

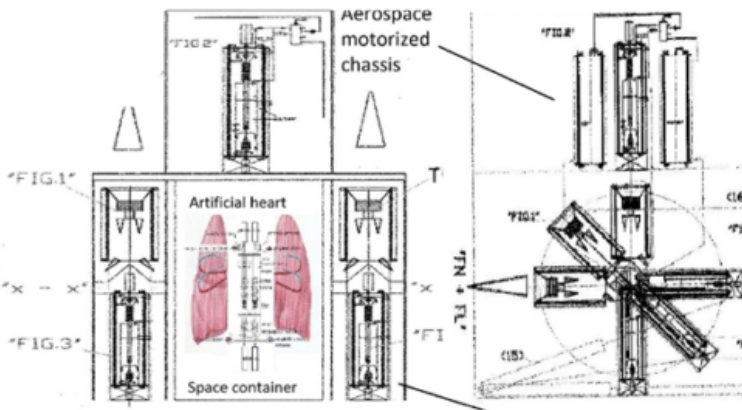

(bc1qr4dl5wa7kl8yu792dceg9z5knl2gkn220lk7a9)

I will wait for your response.
